

CPD Seminar

Helical Micro-Piling, New-Construction, Foundation Stabilisation, Structural Repair

This CPD seminar aims to educate the specifier in the methods of supporting new structures that are to be constructed on poor ground or in other challenging site conditions and also the stabilisation of existing structures that have suffered damage caused by foundation movement.

During a one hour seminar we will address the benefits of non-disruptive lightweight micropiling with regard to cost effectiveness, project timescales, environmental impact, sustainability and design implications.

Seminar Programme

- How can we help?
- Development of the Helical Micro-pile
- Installation Methods
- Combining Helical Micro-piles and Helibeam
- Case Studies
- Summary
